

PosiTest[®] DT

Dust Tape Test

Assesses the quantity and size of dust particles on blast cleaned surfaces in accordance with ISO 8502-3

Handy Dust Test Comparator includes pictorial references to determine dust size and dust quantity rating

Features...

- Includes all report forms and accessories required for dust tape testing in accordance with ISO 8502-3
- Can be used as a pass/fail test or to provide a permanent record of the dust present on a surface
- Illuminated 10x magnifier with stand-off to keep the magnifier at the appropriate distance away from the substrate—compact, foldable design for easy storage
- Report forms include all information as required by ISO 8502-3
- Dust Test Comparator includes pictorial references from ISO 8502-3 to determine dust size and dust quantity rating
- Reusable Transparent Display Board
- Suitable for field or laboratory use
- Durable hard shell case keeps contents secure
- Optional spring-loaded Dust Tape Roller available to apply constant force as recommended by ISO 8502-3
- Two year warranty
